

LUIS ALBERTO CABEZAS MORENO

PLATFORM ENGINEER

SKILLS

- ◆ **Languages:** Advanced English, Native Spanish.
- ◆ **Framework, practice and culture:** ITIL, PMI, Kanban, Scrum, DevOps.
- ◆ **Cloud Technologies:** Amazon Web Services, Microsoft Azure.
- ◆ **Databases:** PL / SQL, JDBC, DB2, MS Sql Server, PostgreSQL, Oracle DB.
- ◆ **Networks:** Firewall management.
- ◆ **Protocols:** TCP, UDP, SNMP, Corba, EIF, SYSLOG, FTP, POP, SMTP, HTTPS, SFTP, SSH.
- ◆ **CSG Softwares:** SingleView.
- ◆ **Entrust Datacard Softwares:** Trucredential, Suit AIS.
- ◆ **IBM Softwares:** IBM Tivoli Monitoring, IBM Tivoli Netcool OMNIbus, IBM Cloud Application Performance Management.
- ◆ **Operating systems:** Windows, Linux - Red Hat, Unix- AIX.

PROFILE

My passion lies in the future of IT Cloud solutions and their potential to transform businesses into high-performance digital enterprises.

I have 9+ years of experience as an IT Engineer; taking on various roles such as Platform Engineer, a role I currently hold. IT Consultant, System Administrator, IT Services Implementation Consultant and Support Engineer. Throughout my career, I have worked across diverse industries, including telecommunications, passport issuance, payment card systems, digital identification, and IT service monitoring. My expertise includes DEVOPS, CI/CD, cloud support, KPI, KQI, and SLA management, ensuring high operational efficiency and system reliability.

My technical proficiency spans Linux and Windows OS, Oracle DB, AWS Cloud Support, Microsoft SQL Server, DB2 DB and virtualization platforms. I have extensive experience in installing, implementing, managing, and supporting Entrust Datacard and IBM technology architectures, as well as handling operational incident support.

I am fully available for any work schedule, willing to relocate and travel frequently. My goal is to leverage my knowledge, experience, ethics, and responsibility to contribute effectively to an organization that values innovation and excellence in IT solutions.

EMPLOYMENT HISTORY

Platform Engineer

CSG International Colombia S.A.S | October 2022 – Present

- Provide support solutions for internal and external customer queries related to supported platforms, including Oracle Database, Microsoft Azure VMs, Unix Shell Scripting, SingleView infrastructure, and AWS.
- Plan and execute release installations using Jenkins CI/CD automations.
- Monitor and maintain backup infrastructure, ensuring data integrity and availability.
- Continuously monitor and test system and application performance, proactively identifying and resolving potential bottlenecks.
- Skills in scripting languages (e.g., Bash) for automating tasks, managing deployments, and troubleshooting issues.
- Configure, maintain, and support backup and redundancy strategies to ensure system reliability.
- Actively contribute to the development and improvement of internal processes.
- Modify and enhance existing systems to optimize performance and scalability.
- Educate teams on implementing new cloud technologies and best practices.
- Identify, analyze, and resolve infrastructure vulnerabilities and application deployment issues.
- Regularly review existing systems and provide recommendations for enhancements.
- Engage with internal and external customers, offering cloud support and tailored recommendations based on their needs.
- Continuously expand technical expertise and take on additional responsibilities as directed by management.
- Participate in support rotations as required.

IT Consultant and System Administrator

Intecsus s.a.s | September 2019 – October 2022

- Specialize in PhotoID, digital identification, and instant issuance of credit and debit card solutions.
- Implement IT service projects in alignment with commercial agreements and client expectations.
- Assist in defining technical specifications for each project.
- Execute proper procedures for installation, configuration, and management of complete technology solutions.
- Provide support for payment solutions and HSM PayShield.
- Demonstrate problem analysis and troubleshooting skills, maintain contact with suppliers, and develop technical documentation/manuals.
- Manage large-scale projects with minimal supervision.
- Act as the first point of escalation, resolving customer issues efficiently, particularly during crisis situations.
- Troubleshoot complex IT challenges and implement effective solutions.
- Collaborate with internal teams and external vendors to ensure successful project execution.

IT Services Implementation Consultant

BPS Service, Consulting and Development s.a.s | November 2016 – April 2019

- Implement IT service projects in alignment with commercial commitments.
- Collaborate in defining technical specifications for each project.
- Execute proper procedures for installation, configuration, and management of complete technology solutions.
- Apply high-availability mechanisms to ensure the optimal and uninterrupted operation of all provided services.
- Implement backup and recovery policies to safeguard all managed data.
- Monitor and control the operation of all components within the technological solution.
- Additional responsibilities include problem analysis, supplier coordination, and technical documentation/manual writing.

Featured Projects:

1. Banco Popular – Phase 2
 - Role: Implementation Engineer
 - Scope: Installation, configuration, management, and support of IBM Cloud Application Performance Management (Private 8.1.4) in a High-Availability (HA) environment.
2. Banco Popular – Phase 1
 - Role: Implementation Engineer
 - Scope: Installation, configuration, management, and support of IBM Cloud Application Performance Management (Private 8.1.3).
3. Banco de Bogotá
 - Role: Implementation Engineer
 - Scope: Installation, configuration, management, and support of IBM Cloud Application Performance Management (Private 8.1.3).

Support Engineer

BPS Service, Consulting and Development s.a.s | October 2014 – March 2016

- Provided technical support for Telefónica Perú, specializing in IBM/Tivoli solutions. Managed the Tivoli Netcool/OMNIBus platform, including gateway implementation, probe configuration, and alert mapping.
- Delivered networking support for Argos and Tele-Bucaramanga, key clients of the company.
- Resolved first-level tickets on IBM Tivoli Netcool platforms.
- Integrated technologies using SNMP, Logfiles, and CORBA protocols.
- Managed Windows, AIX, and Linux operating systems.
- Performed weekly server backups for IBM Tivoli applications.
- Provided 24/7 availability for critical system support.
